Accuracy of Information

MetaGrow will strive to ensure accuracy of information on this whitepaper although it will not hold any responsibility for any missing or wrong information. MetaGrow provides all information *as is*. You understand that you are using any and all information available here at your own risk.

SUMMARY

What Is Cryptocurrency?

A cryptocurrency is a digital or virtual currency that is secured by cryptography, which makes it nearly impossible to counterfeit or double-spend. Many cryptocurrencies are decentralized networks based on blockchain technology—a distributed ledger enforced by a disparate network of computers. A defining feature of cryptocurrencies is that they are generally not issued by any central authority, rendering them theoretically immune to government interference or manipulation.

What Is BSC?

Binance Smart Chain (BSC) is a blockchain network built for running smart contract-based applications. BSC runs in parallel with Binance's native Binance Chain (BC), which allows users to get the best of both worlds: the high transaction capacity of BC and the smart contract functionality of BSC.

What is P2E Gaming?

P2E games are blockchain-based games whose business models involve the incentivization of players through monetary rewards, allowing them to earn money in an open economy. The incentives vary depending on the gameplay and in-game objectives, but essentially, P2E games allow players to earn while playing.

What is MetaGrow?

MetaGrow is a smart contract deployed on the Binance smart chain with its own cryptocurrency called META, which works on an autonomous liquidity generation protocol.

Investors are incentivised for holding their MetaGrow tokens and are rewarded with XRP(Ripple). This mechanism enables investors to earn passive income every hour in the form of XRP tokens. The dividends are paid out on an hourly, the size of the dividend depends on the amount of META tokens held at that point of time.

What is P2E Gaming and MetaGrow?

In advent of NFTs in blockchain, team at MetaGrow understands the positive impact these tradable assets have on the entertainment and gaming industry. Investor's growth is of perineal importance to us and us at MetaMask are developing a game that incentivises players with Tokens and Mintable NFTs that can be traded on the platform, we also plan to make your NFTs tradeable in different blockchains and in order to enable that we also would be building cross chain bridges to enable such trade and transactions.

Our Game MetaClash is inspired by Clash of the clans which happens to be one of the most downloaded and played games till date. In MetaClash characters are inspired by Memes and as we know Meme tokens are a rage in the cryptocurrency space, which has empowered masses to invest and become overnight millionaires. Our Meme stars pitch battles against each other, trade power cards, accumulate superpowers, earn tokens and to top the list, players can Mint NFTs and trade in the MetaClash game.

TOKENOMICS OF METAGROW

Tax on transactions is charged at the time of a buy or a sell

- 15% for every buy and sell

Rewards/Reflections/Dividends

- 6% is paid in the form of XRP rewards every hour, however the amount of XRP rewards depends on the size of your holding

Marketing

- Marketing being a major factor for the success of any project in this space, 3% of every transaction within that 15% tax is allocated for marketing

Liquidity

- Liquidity being one of the essential factors that enable successful sells, 3% is added to the liquidity from within the 15% tax

Development

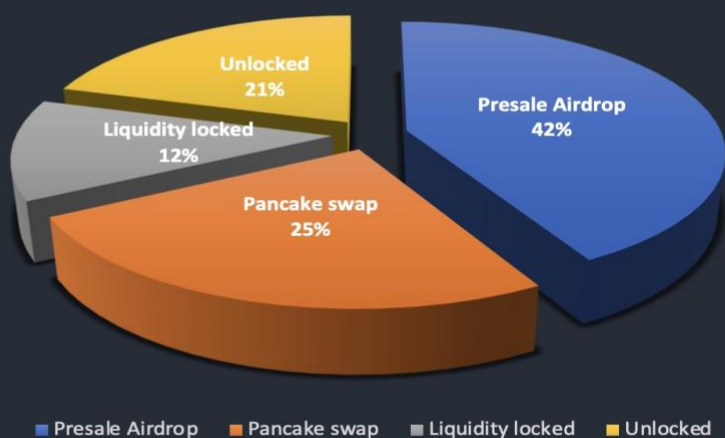

- Since development of the game and the ecosystem is of essential importance to us and the investors, we allocate 2% of the transactions within that 15%

Buybacks

- Markets are susceptible to fluctuations and to ensure price stability we have 1% within that 15% to make strategic buy backs to protect the investments of our investors

-

Overall Token Distribution
